FIGURES ON THE ELECTRICITY MARKET 2017: ELECTRICITY SUPLLIER SWITCHES

Since January 1st 2004, VREG sets up a monthly survey of the distribution network operators concerning the number of access points. Details about the delivered quantities per supplier are only requested once a year with respect to the previous calendar year.

The published figures only involve the Flemish territory and they are limited to the activities on the distribution network, defined as the network with a nominal tension equal as or less than 70 kV. They will be updated every three months.

Met ingang van 1 januari 2006, verdwenen de toegangspunten die door Inter-energa (voorheen Interelectra) in het verleden toegekend werden aan een exclusief nachtmeter, uit de statistieken. In het verleden telden de gezinnen met een exclusief nachtmeter in het gebied van Inter-energa voor twee, wat deels een vertekend beeld gaf. In theorie kunnen deze gezinnen weliswaar een andere leverancier kiezen voor levering aan de exclusief nachtmeter. In de praktijk zal dit meestal niet gebeuren.

Table 1: Suppliers market shares based on the total number of end users electricity (access points)

	jan 2017	feb 2017	mrt 2017	apr 2017	mei 2017	jun 2017	jul 2017	aug 2017	sep 2017	okt 2017	nov 2017	dec 2017
